## FOR HEALTH

### Diabetes

## PHARMACY BENEFITS

Do you have your drug benefits with BlueChoice<sup>®</sup> HealthPlan? To check, look at your ID card. If the Caremark logo is on the card, we provide your pharmacy benefits. On behalf of BlueChoice HealthPlan, Caremark administers pharmacy benefits. Caremark is an independent company that administers pharmacy benefits.

BlueChoice HealthPlan has three categories of copayments for drugs. Generic drugs have the lowest copayment. Preferred drugs have the middle copayment, while Non-preferred drugs have the highest copayment.

Most medications used for diabetes are preferred, so your copayment should be at the Preferred level. Please check this list. If you are taking any of the Non-preferred drugs, you may want to talk to your doctor to see if a Preferred medication would work well for you. It'll save you money!

### Non-preferred Medication

Amaryl<sup>®</sup>  
Glyset <sup>®</sup>  
Glucophage<sup>®</sup>  
Glucophage XR<sup>®</sup>
