

# 2011 Lifestyle Medication List

Certain drugs that are not covered under BlueChoice HealthPlan's pharmacy benefit are available at a discounted price. These "lifestyle" drugs do not have a copayment, but usually will reduce your cost by 10 to 20 percent from the retail price.

To take advantage of this Lifestyle Medication discount, bring your prescription to a participating pharmacy, along with your current BlueChoice HealthPlan identification card. You will be charged the discounted price for the prescription at the time of purchase. Please note that products NOT covered under your pharmacy benefit, such as contraceptive agents, are the only ones available at the discounted price. Check your benefits to see if any of the drugs listed here might be eligible.
