

Diabetic Shoes

Foot care is very important for people with diabetes. Your shoes should be comfortable, fit well and protect your feet. Check inside your shoes before wearing them. Make sure the lining is smooth and there are no objects inside.

If you have any of the following conditions, you may qualify for diabetic shoes or inserts:

- ◆ Foot deformities
- ◆ History of foot ulcers or cellulitis
- ◆ Poor circulation in your legs and feet
- ◆ Loss of feeling in your feet

If you think you need diabetic shoes or inserts discuss this with your doctor. If your doctor agrees, he or she will need to give you a prescription. Take this prescription to one of the shoe providers listed on the next page of this form. Please confirm with the provider that they are still contracting with BlueChoice HealthPlan.

You can also check for an updated list of providers on our Web site, BlueChoiceSC.com. Choose *Health & Wellness*, then *Great Expectations for Health Programs*, then ***Diabetes***.

The shoe provider will request the required approval. If the shoes are approved, **you will be responsible for any deductible, copayment or coinsurance**. If you have questions about what you will be responsible to pay, please call BlueChoice HealthPlan Member Services at 800-368-2528 from 8:30 a.m. to 8:30 p.m. Monday – Friday.
