PRILOSEC OTC

BlueChoice HealthPlan has expanded its coverage of over-the-counter (OTC) drugs to include **Prilosec OTC** (omeprazole).

Members can now fill their physician's prescription for **Prilosec OTC** under their pharmacy benefits with us. (Please see the example below for guidance on how to write the prescription to ensure coverage.) For a one month's supply of up to twice daily dosing, members will pay the generic (lowest) copayment. This is less than the retail cost of the medication. **Prilosec OTC** is also available without the prior authorization requirements that are normally placed on the proton pump inhibitor medication class.

If you have questions or need more information, please contact your Health Network Services Representative at 1-800-327-3183.
