

# Drug Exclusions

July 1, 2021

## Why Doesn't My Health Plan Cover Some Drugs?

---

From time to time, our pharmacy committee decides to no longer cover, or **exclude**, some drugs because other safe, effective, less costly alternatives are available. The committee is composed of independent doctors and pharmacists who regularly review and compare prescription drugs to ensure the ones we cover include proven medications for treating the majority of medical conditions.

Newly-launched products and new variations of products already on the market are **not** automatically added to your health plan's list of covered drugs, also known as a **formulary**. A product can be added to the formulary only if our pharmacy committee decides that it is clinically appropriate and cost-effective.

## What Should I Do If My Drug Is Excluded?

---

Talk to your doctor to see if a covered alternative drug is a good option for treating your condition. Note that **many excluded brand-name drugs have covered generic alternatives**.

Of course, you and your doctor make the final decision about the medications that are right for you. If your doctor believes no alternative drug will work for your medical condition, you or your doctor can request a **formulary exception** to have an excluded drug covered. Just follow these steps:

### Providers

To request a formulary exception for a drug noted on the list with a (+), call **877-440-0089**. To request a formulary exception for all other listed drugs, call the precertification number on the member's ID card.

### Members

To request a formulary exception for all drugs listed, call the Customer Service number on your ID card.

**Note: Formulary exceptions can only be considered with required documentation from the member's health care provider.**

## What Happens If I Have A Prescription Filled For An Excluded Drug?

---

You will be able to get your drug, but you will pay the full cost of it.

## What Drugs Are Excluded From Coverage?

---

The drugs on the following pages are excluded from coverage as of the date of this list.

Your pharmacy benefit may not cover certain categories of drugs, such as those used to treat weight loss or sexual dysfunction. Please check your plan materials for details about coverage for a specific drug category.

Check your benefit information to verify coverage or view your personal benefit information on our website. This list may contain trademarks or registered trademarks of pharmaceutical manufacturers that are not affiliated with your health plan. This list may change or expand from time to time without prior notice.
