

Medical Drug List

Effective April 1, 2022

Most benefit plans include medical drug management, including prior authorization. Check your plan materials to see if this information applies to you. This list may change or expand from time to time without prior notice.

Drugs on this list may require prior authorization (PA) under the **medical benefit** through our Specialty Medical Benefit Management (SMBM) program. To start the PA process, providers should sign into the health plan's provider website to access the online medical prior authorization system. Providers can also request prior authorization by calling 877-440-0089 or faxing requests to 612-367-0742. A PA does **not** guarantee eligibility or payment of a claim. Provider specialty is considered when reviewing all medical and self-administered drug prior authorization requests.

Drugs noted with a hashtag are preferred. Drugs noted with an asterisk require PA **and** may only be authorized to be administered in certain locations (sites of care), such as an infusion center or the patient's home. Drugs noted with a carat **do not** require PA.

For members who have a medical PA requirement, these drugs always require PA if billed under the medical benefit, unless otherwise noted.
