Specialty Medical Drug List

Effective October 1, 2026

Most benefit plans include medical specialty drug management and prior authorization requirements. Check your plan materials to see if this information applies to you. This list may change or expand from time to time without prior notice.

Drugs on this list may require prior authorization under the **medical benefit** through our Specialty Medical Benefit Management (SMBM) program.

To start the prior authorization process, providers should sign-in to the health plan's provider website to access the online medical prior authorization system. Providers can also request prior authorization by calling **877-440-0089** or faxing requests to **612-367-0742**.

A prior authorization does **not** guarantee eligibility or payment of a claim. Provider specialty is considered when reviewing all medical and self-administered drug prior authorization requests.

Drugs noted with an ampersand **(&)** are **excluded** from coverage.

For members who have a medical prior authorization requirement, these drugs always require prior authorization if billed under the medical benefit unless otherwise noted (Marketplace/Affordable Care Act (ACA) lines of business does not require prior authorization for Hemophilia Treatment Products).
